ULTRALABEL
## UNIQUE LABELLING SOFTWARE

Market leading software

Outstanding Features

 • **Simple label design and print modules** are coupled with all the database and media design tools you will ever need.

• **A range of comprehensive date variables** help prevent "illegal" dates and by using the database and other restricted variables, you will reduce the risk of input errors and time-wasting duplication of data.

• **A wide range of field types** (such as barcodes, text & graphics) allow the simple creation of complex label formats.

• **Designed so that it can be used with any label printer** including UltraTech, GoDEX™, TSC™, Toshiba TEC™, Zebra™ & Sato™ (using standard embedded drivers) or any other printer (with a supported Windows™ driver).

• **Pre-designed self adhesive & box end label templates** are supplied for many of the major multiples (Including Tesco, Waitrose, Asda etc.)

• **Can also be used to create** SSCC, Odette, pallet type label templates.

• **Works with SQL, Excel & other databases** to allow the clients own existing data to be easily used.

• **Customisable print queue facilities & product look-up capability** allows the flexibility and organisation that you need.

ULTRALABEL
UNIQUE LABELLING SOFTWARE

A market leading labelling software

Developed in-house by labelling experts with over 30 years experience, Ultralabel is a sophisticated, easy to use labelling software which makes light work of creating complex labels. It is a powerful and up-to-date Windows™-based package with a simple user-friendly interface, making label creation the easiest yet.

UltraLabel can be used as a single standalone application or as a network package, allowing several simultaneous users to run the software from any station on the network.

Software versions include: **Full design mode** (where the design element is fully password protected for security), **Print only** & **Ultralabel Lite** (which uses an embedded data list function and is designed mainly for simple label formats, without integration).

PLEASE NOTE: A print only version will need access to a full version of UltraLabel on-site to allow creation & editing of any labels.
